

Deadlines

- 01 June 2018 Closing date for applications
- 29 June 2018 Confirmation of papers
- 25 September 2018 Closing date for poster session proposals
- 15 October 2018 Confirmation of poster proposals
- 05 November 2018 Closing date for submitting conference manuscripts / print versions of posters
- 06 December 2018 Workshop PART 1 & Come Together
- 07 December 2018 Workshop PART 2

**Berlin-Adlershof
06 and 07 December 2018**

Call for Papers

Objective

The workshop series *3D-NordOst* is targeting the transfer of topical know-how in 3D-data and image processing to industrial sectors as well as to cultural and medical applications and practice. The workshop provides a platform for developers and users to discuss the broad spectrum of 3D related topics.

Interested authors are invited to submit algorithm- and application-oriented papers. Contributions focusing on sensor calibration, algorithmic optimization, visualization and presentation of 3D content are also welcome.

Abstracts / Submissions

By **01 June 2018**, the authors are asked to submit extended abstracts (max. two pages) via eMail (3d-nordost@gfai.de) to the workshop organization.

After confirmation (until **29 June 2018**) camera-ready contributions (in German or English language, max. 10 pages A5 including colored images) will be expected until **05 November 2018**.

A *poster session* is organized, proposals should be submitted to the workshop organization (Deadline: **25 September 2018**). Confirmation: until **15 October 2018**; submitting print version: until **05 November 2018** (poster image and a maximum of three supplementary text pages).

Accepted papers/posters will be published in the ISBN referenced *3D-NordOst* conference proceeding series.

A small exhibition is organized. Please submit proposals for presentations to the workshop organization.

Organizer

The GFaI was founded in 1990 and is active in Berlin-Adlershof, a significant scientific, economic and media location in the capital region Berlin-Brandenburg. Adlershof evolved into one of Europe's largest technology parks.

The work fields of the GFaI include contract R&D as well as scientific projects. Over 100 companies, universities and institutions and about 100 people are member of the GFaI.

Over 100 employees are working at the GFaI. The GFaI has many successful collaborations with SMEs, research organizations, authorities and big companies.

GFaI fields of expertise are Image Processing for Industrial Applications and Document Analysis, 3D Data Processing, Graph Based Engineering Systems, Computer Aided Facility Management, Signal Processing / Acoustic Camera as well as Structural Dynamics / Pattern Recognition.

The building of the GFaI in the science and technology park Berlin-Adlershof
