

Deadlines

- 01 September 2019** Ultimate closing date for applications
- 13 September 2019** Confirmation of papers
- 25 September 2019** Closing date for poster session proposals
- 15 October 2019** Confirmation of poster proposals
- 04 November 2019** Closing date for submitting conference manuscripts / print versions of posters
- 05 December 2019** Workshop PART 1 & Get Together
- 06 December 2019** Workshop PART 2

**Berlin-Adlershof
05 and 06 December 2019**

Call for Papers

Objective

The workshop series *3D-NordOst* is targeting the transfer of topical know-how in 3D-data and image processing to industrial sectors as well as to cultural and medical applications and practice. The workshop provides a platform for developers and users to discuss the broad spectrum of 3D related topics.

Interested authors are invited to submit algorithm- and application-oriented papers. Contributions focusing on sensor calibration, algorithmic optimization, visualization and presentation of 3D content are also welcome.

Abstracts / Submissions

By **01 September 2019**, the authors are asked to submit extended abstracts (max. two pages) via eMail (3d-nordost@gfai.de) to the workshop organization.

After confirmation (until **13 September 2019**) camera-ready contributions (in German or English language, max. 10 pages A5 including colored images) will be expected until **04 November 2019**.

A *poster session* is organized, proposals should be submitted to the workshop organization (Deadline: **25 September 2019**). Confirmation: until **15 October 2019**; submitting print version: until **04 November 2019** (poster image and a maximum of three supplementary text pages).

Accepted papers/posters will be published in the ISBN referenced *3D-NordOst* proceedings.

A small exhibition is organized. Please submit proposals for presentations to the workshop organization.

Organizer

The GFaI was founded in 1990 and is active in Berlin-Adlershof, a significant scientific, economic and media location in the capital region Berlin-Brandenburg. Adlershof evolved into one of Europe's largest technology parks.

The fields of work of GFaI include contract R&D as well as scientific projects. Over 100 companies, universities and institutions and about 100 people are member of the GFaI.

Over 100 employees are working at the GFaI. The GFaI has many successful collaborations with SMEs, research organizations, authorities and big companies.

GFaI fields of expertise are Image Processing for Industrial Applications and Document Analysis, 3D Data Processing, GraphBasedEngineeringSystems, Computer Aided Facility Management, Text Mining Software, Signal Processing/Acoustic Camera as well as Structural Dynamics / Pattern Recognition.

The building of the GFaI in the science and technology park Berlin-Adlershof
