

Deadlines

01 June 2017	Closing date for applications
30 June 2017	Confirmation of papers
25 September 2017	Closing date for poster session proposals
11 October 2017	Confirmation of poster proposals
06 November 2017	Closing date for submitting conference manuscripts / print versions of posters
07 December 2017	Workshop PART 1 & Come Together
08 December 2017	Workshop PART 2

20th Workshop

Call for Papers

Objective

The workshop series *3D-NordOst* is targeting the transfer of topical know-how in 3D-data and image processing to industrial sectors as well as to cultural and medical applications and practice. The workshop provides a platform for developers and users to discuss the broad spectrum of 3D related topics.

Interested authors are invited to submit algorithm- and application-oriented papers. Contributions focusing on sensor calibration, algorithmic optimization, visualization and presentation of 3D content are also welcome.

The *special session* "3D Object Recognition and Tracking" will be included in the workshop program (Session organization: reulke@informatik.hu-berlin.de).

Abstracts / Submissions

Authors are asked to submit extended abstracts (max. two pages) via eMail to pochanke@gfai.de. Please mark "*3D-NordOst*" or "*3D-NordOst Special Session*" in the subject line. Closing date for applications is **01 June 2017**.

After confirmation (until **30 June 2017**) camera-ready contributions (in German or English language, max. 10 pages A5 including colored images) will be expected until **06 November 2017**.

A *poster session* is organized, proposals should be submitted to the workshop organization (Deadline: **25 September 2017**). Confirmation: until **11 October 2017**; submitting print version: until **06 November 2017**.

Accepted papers/posters will be published in the ISBN referenced *3D-NordOst* conference proceeding series.

A small exhibition is organized. Please submit proposals for presentations to the workshop organization.

Organizer

The GFaI was founded in 1990 and is active in Berlin-Adlershof, a significant scientific, economic and media location in the capital region Berlin-Brandenburg. Adlershof evolved into one of Europe's largest technology parks. The work fields of the GFaI include contract R&D as well as scientific projects. Over 100 companies, universities and institutions and about 100 people are member of the GFaI.

Over 100 employees are working at the GFaI. The GFaI has many successful collaborations with SMEs, research organizations, authorities and big companies.

GFaI fields of expertise are image processing for industrial applications and document analysis, 3D data processing, graph based engineering systems, CAFM, signal processing / Acoustic Camera, adaptive modelling/pattern recognition, text mining and analytics as well as hardware and interference systems.

The building of the GFaI in the science and technology park Berlin-Adlershof
