# **3D-NordOst 2020**

23<sup>th</sup> Application-oriented Workshop on Measuring, Modeling, Processing and **Analysis of 3D-Data** 

- GFal Workshop Series 3D-NordOst -

www.3d-nordost.de

### **Berlin-Adlershof** 03 and 04 December 2020

# **Call for Papers**

### **Objective**

The workshop series 3D-NordOst is targeting the transfer of topical know-how in 3D-data and image processing to industrial sectors as well as to cultural and medical applications and practice. The workshop provides a platform for developers and users to discuss the broad spectrum of 3D related topics.

Interested authors are invited to submit algorithm- and application-oriented papers. Contributions focusing on sensor calibration, algorithmic optimization, visualization and presentation of 3D content are also welcome.

Contact GFal (Bowerbird code)

### Abstracts/Submissions

By 01 September 2020, the authors are asked to submit extended abstracts (max. two pages) via eMail (3d-nordost@gfai.de) to the workshop organization.

After confirmation (until 14 September 2020) cameraready contributions (in German or English language, max. 10 pages A5 including colored images) will be expected until 02 November 2020

A *poster session* is organized, proposals should be submitted to the workshop organization (Deadline: 25 September 2020). Confirmation: until 15 October 2020; submitting print version: until 02 November 2020 (poster image and a maximum of three supplementary text pages).

Accepted papers/posters will be published in the ISBN referenced 3D-NordOst proceedings.

A small exhibition is organized. Please submit proposals for presentations to the workshop organization.

# Organizer

The GFal was founded in 1990 and is active in Berlin-Adlershof, a significant scientific, economic and media location in the capital region Berlin-Brandenburg. Adlershof evolved into one of Europe's largest technology parks.

The fields of work of GFal include contract R&D as well as scientific projects. Over 100 companies, universities and institutions and about 100 people are member of the GFal.

Over 100 employees are working at the GFal. The GFal has many successful collaborations with SMEs, research organizations, authorities and big companies.

GFal fields of expertise are Image Processing for Industrial Applications and Document Analysis, 3D Data Processing, Graph Based Engineering Systems, Computer Aided Facility Management, Text Mining Software, Signal Processing/Acoustic Camera as well as Structural Dynamics/Pattern Recognition.
